### **JFRN Mission:**

On the John Fredericks Radio Network, our mission from the inception has never wavered. Our daily goal is to provide our listeners with highly relevant local, state and national news in a straight-up unfettered fashion, and to bring the very people that make the news right when it happens into our listeners' homes, cars and digital devices. We dial our audience into the news as it formulates so they can experience it live and unplugged. Analysis is based on fact — not fiction, partisan bias or rote talking point downloads. We call like we see it, not how we'd like it to be, or what is politically popular opinion. We are an independent voice and a clean broker for the truth – not beholden to any faction, political agenda, strident ideology or issue-driven conglomerate. We give listeners straight, with no gibberish, no nonsense and no bells and whistles. What sets us apart is our daily dose of high-octane relevant and candid guest interviews we serve up to our listeners each and every day.
